TIS®300 Series
Electrically Conductive Silicone

TIS®300 Series is a nickel/graphite-filled conductive silicone sheet is developed for thermal management and electromagnetic interference (EMI) suppression in 3C electronic products, high-frequency signal equipment and precision electromagnetic components. It delivers excellent thermal conductivity and surface resistivity, together with high compressibility and soft elasticity, making it suitable for low-pressure mounting conditions. This material series resists galvanic corrosion and maintains its stability under harsh environmental conditions.

Features

- Good thermal conductivity
- Surface resistivity (Ohm·cm) :< 1.0×10^3
- Good corrosion resistance
- Good compressibility, soft yet elastic, suitable for low-stress applications

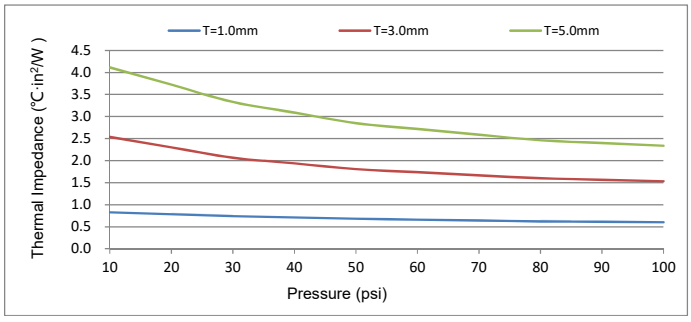

Applications

- EMI shielding & grounding for gaps of chassis cover plates
- Grounding for power battery module housings
- Sealing & shielding for enclosures of RRU, switches and blade servers
- Industrial-control equipment cavities
- Sealing for test shielding boxes
- Grounding & shielding for cavity covers of on-board power supplies
